PROFESSIONAL SUMMARY

Full Stack Developer with 2 years of experience building scalable web applications using Next.js, Node.js, and PostgreSQL. Skilled in designing secure APIs and automating business processes to improve operational efficiency.

TECHNICAL SKILLS

- **Frontend:** HTML5, CSS3, JavaScript , React.js, Next.js, Redux,TypeScript.
 - **Backend:** Node.js, Express.js, PHP, Python.
 - **Databases:** MongoDB, PostgreSQL.
 - **Tools & Architecture:** JWT, API Gateway, Middleware, RESTful APIs, Git, Postman,Nginx.
 - **Business Process Automation:** Export Operations Logic, Invoice Generation Modules.
-

CERTIFICATIONS

- Certified MERN Stack Developer
 - Professional Certificate in Python Programming
 - PHP Web Development Certification
-

EXPERIENCE

Full Stack Developer | 6 Solve IT Services | Dec 2024–Present.

- Architected and maintained end-to-end web applications using Next.js and Express.js.
- Implemented secure authentication systems using JWT and custom Middleware for role-based access control.
- Designed complex database schemas in PostgreSQL to handle large-scale enterprise data.
- Developed an API Gateway to streamline communication between microservices, Reduced API response time by 20% through streamlined microservice communication.

Full Stack Intern | Vulturelines Technology | July 2024 - Aug 2024

- Enhanced and maintained web application features using React.js for frontend development and Node.js for backend development.
- Collaborated on bug fixing and UI optimization for client-facing web portals.

PROJECTS

1. Human Resource Management System (HRMS)

- Developed a comprehensive Attendance Tracking Module with real-time check-in/out functionality and leave management logic.
- Enforced secure Role-Based Access Control (RBAC) using JWT and custom Middleware to protect sensitive employee data.
- Automated the Onboarding and Payroll process, reducing manual HR paperwork by integrating automated data validation.
- Engineered the backend using Node.js and PostgreSQL to maintain ACID compliance for employee financial records and history.

2. CRM & Finance/Accounting System

- Designed a centralized Lead Management System within the CRM to track customer lifecycles from acquisition to conversion.
- Built an Automated Invoicing Engine that generates professional PDF invoices with dynamic tax (GST/VAT) calculations using Next.js.
- Integrated a Financial Ledger module that synchronizes with the Accounts section to provide real-time profit and loss insights.
- Utilized Express.js to build high-performance endpoints for handling bulk financial transactions and data exports.

3. Export Operations System

- Architected a Global Tracking Workflow to monitor shipment statuses and logistical milestones in real-time.
- Reduced manual entry errors by 40% by enhancing the Documentation Automation tool in the Export Operations System.
- Applied an API Gateway to aggregate data from multiple shipping vendors and internal warehouse databases.
- Executed the system's Middleware to handle high-frequency status updates via webhooks, ensuring data consistency across the platform.

EDUCATION

Secondary School

S.Shunmuga Sundara Nadar Higher Secondary School,
Authoor.2019-2021

Graduation

B.Tech in Information Technology,
Dr.Sivanthi Aditanar College of Engineering
Tiruchendur.2021-2025
